SOLDER FEED STAND

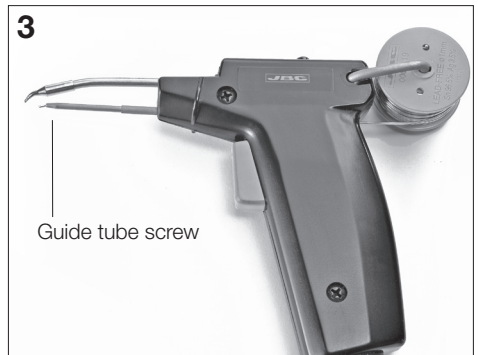

CHANGING THE CARTRIDGE

- Loosen the cartridge screw (1) to release the cartridge.

- Place the new cartridge in the solder feed handle.
Important: It is essential to insert the cartridge till the end for a good connection.
Use the mark ► as reference (2).

- Align the tip of the cartridge with the solder guide tube (3). Tighten the cartridge screw (1).

Warning: It is essential to tighten the cartridge screw for the tool to function.

REPLACING THE REEL

Before fitting a new reel, pull out the solder remaining inside the solder direction tube.

Insert the solder into its hole checking that the wire becomes straight. Pull the trigger intermittently until the solder feed system works by itself.

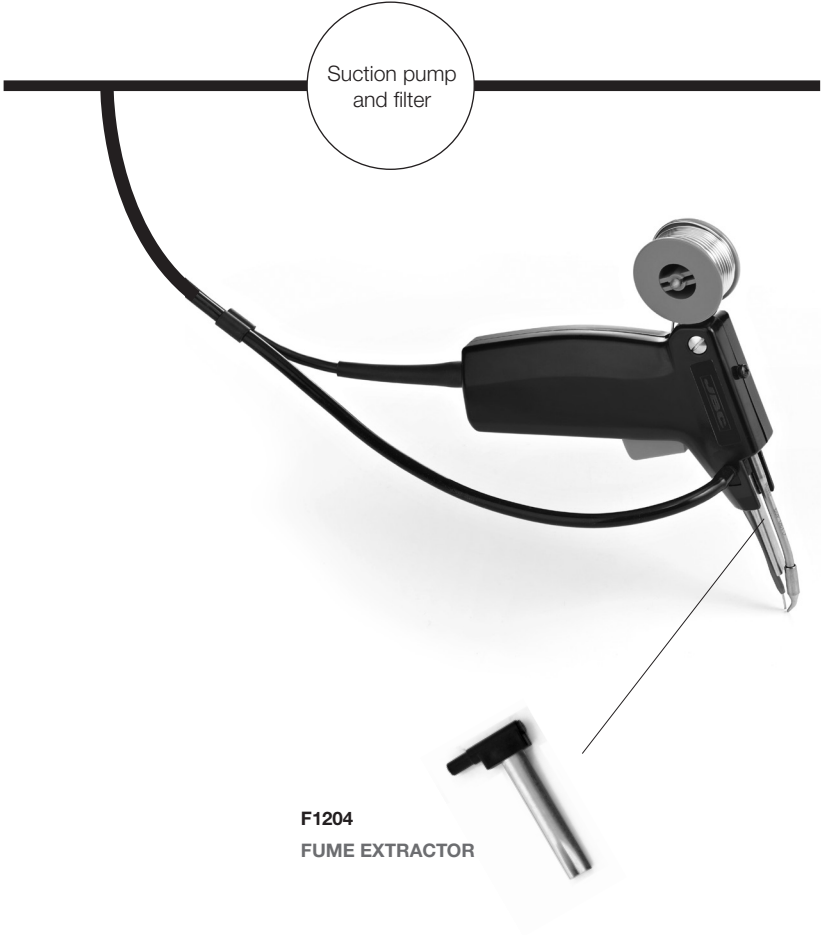

Always use 0.8 to 1.0 mm diameter solder wire.

SOLDER REEL HOLDER

For production-line purposes we recommend using our BE-SA holder which allows for solder reels of sizes up to 2.5 Kg to be used. Simply wrap a couple of turns of the solder wire around an empty reel as shown.

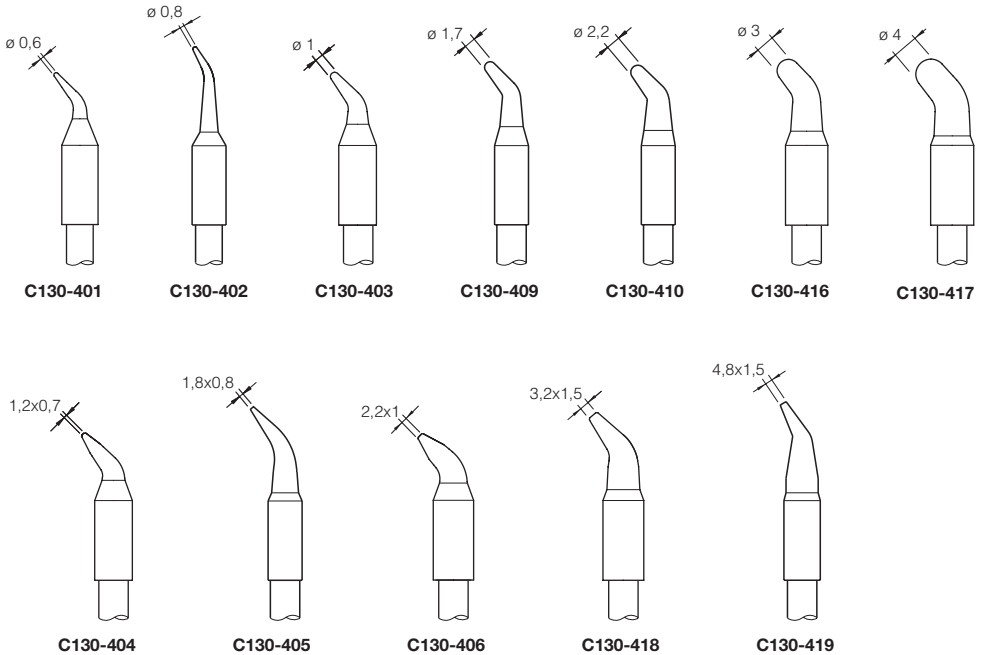

ACCESSORIES

C130 CARTRIDGE RANGE

Consult our wide range of cartridges with more than 250 references in www.jbctools.com.

For special cartridges contact with our distributor.
